## **DETAILED ACTION**

### ***Specification***

The specification makes reference to various US Patent applications, such as at pages 14, 18, 20, and 24-26. Applicants are asked to provide for corresponding Published Application number or Patent number, if available, for each of these applications.

### ***Claim Objections***

Claims 3, 10, 17, and 25 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The objected to claims fail to further limit the independent claims because the "aromatic group" in the definition of R and R' because the corresponding groups in the independent claims (i.e., R<sub>11</sub> and R<sub>12</sub>) do not include "aromatic group" in their definitions.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1756

The instant claims are indefinite as presented because it does not appear that any of the groups  $R_a$  through  $R_r$  can be "a bond" as presented in the respective independent claims. "A bond" requires the connection of two moieties to each other. In the instant claims one of those moieties could be the nitrogen, carbon, or sulfur specified. However, there is nothing disclosed that the bond can connect these atoms to. As presented the claims are indefinite. The dependent claims are similarly indefinite because they do not resolve the indefiniteness present in the independent claims.

#### ***Allowable Subject Matter***

Claims 1-27 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The closest prior art reference is Tokarski *et al.* in US Patent Application Publication 2004/0170910. Although this reference discloses a charge transport material having similar hydrazone moieties as claimed the linking group "Z" of the prior art does not disclose or suggest the group  $X_1-Y-X_2$  as presented in the instant claims.
